

Quick Look

EnteroHealth

What the calf needs when mother isn't there.

Reduced incidence of diarrhea

- Spray-dried egg antibody protects against common diarrhea organisms
- Prolongs the effect of colostrum

Immune stimulation

- Beta glucans wake up the intestinal immune system in young calves
- Not a prescription medication and does not require a VFD

Nutritional supplementation

- Organic trace minerals help correct common newborn deficiencies

Winter and Summer formulas for focused protection in all seasons

Drugs are not the answer. EnteroHealth is.

Caring for Calves... and about the people who raise them.
