

Quick Look

Finish Line Vitamins

Nutritional Benefits

- Selected trace minerals that are commonly deficient in young calves
- B vitamins for the developing digestive tract

Stress Reduction

- Trace minerals and B vitamins deplete rapidly when calves are stressed by birth, transportation, disease, weaning, and co-mingling

Appetite Stimulation

- B vitamins are a natural attitude and appetite booster

NO Copper

- Avoids risk of copper toxicity that can be associated with respiratory disease outbreaks

Low Vitamin A

- Milk replacer and starter grains are heavily supplemented
- High Vitamin A supplementation can cause liver toxicity

Caring for Calves... and about the people who raise them.
